

SUMMER LEARNING IN LOCAL CONTROL ACCOUNTABILITY PLANS

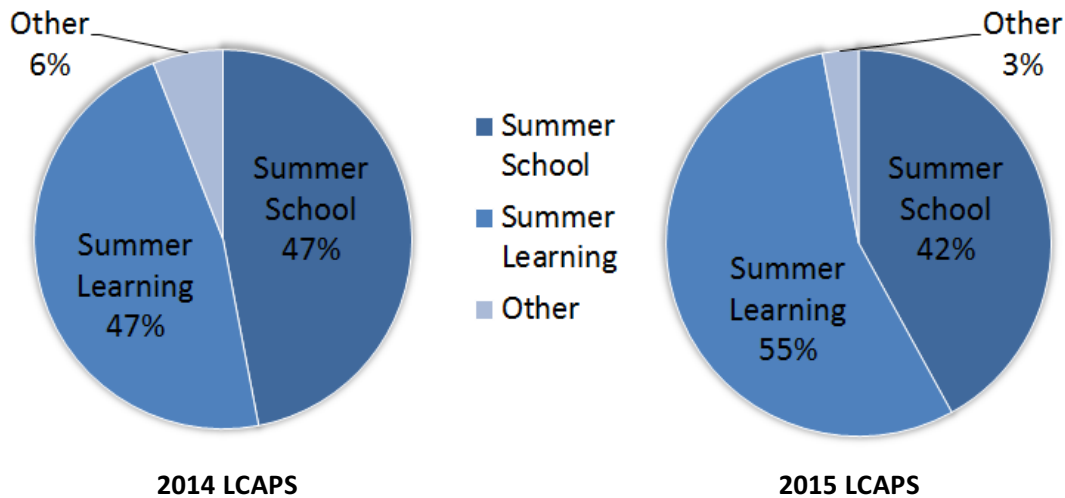

Methodology

The Partnership for Children & Youth reviewed Local Control Accountability Plans (LCAPs) from 50 Local Education Agencies (LEAs) in 2015 to understand district investment in summer programming. The 50 LEAs include 20/25 (80%) of the largest LEAs in California and at least one LEA from 33/58 (56%) of counties in California. This research builds on a 2014 LCAP review, and includes 40 of the same LEAs reviewed last year and 10 new LEAs.

Results

- **76% (38/50) of LEAs reviewed are planning summer programs for 2015-18.** Of those:
 - 55% (21/38) had a **Summer Learning** approach that includes academic and enrichment components.
 - 42% (16/38) had a **Summer School** approach including intervention or remediation during the summer.
 - 3% (1/38) had other expanded year actions like intersession or Saturday school.

An increasing percentage of districts are choosing summer learning

- 82% (31/38) of LEAs with summer learning planned for 2015-18 have budgeted LCFF dollars in 2015-16.
- 69% (24/35) of summer learning was targeted for **all students**. 37% (14/35) was targeted solely or partially for **English Learner** students.

Partnership for Children & Youth is a California-based non-profit organization that finds funding, partners, and solutions to help schools better serve students; and informs state and national public policy on education issues.
